

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

The last chapter of this study presents the conclusion of the study and some suggestions based on the result of the previous discussion. In addition, the conclusion deals with the result of the students' perception on the use of e-book at academic level in IAIN Kediri. The suggestions contain some recommendations for the teacher/lecturers, students, and the next researchers.

#### **5.1 Conclusion**

##### **5.1.1 Students' Perception on the Use of E-book at Academic Level**

Concerning with the research findings of students' general perception, the results indicate that positive responses were given by the students' general view about e-book in learning English. It means that most of the students agree and have positive responses toward using e-book in supporting their English learning, exactly in LATD. In their opinion, anytime and anywhere access, portability/mobility feature and more effective are the main opinion students have regarding the use of e-book.

Many students are motivated to use e-book because of its convenience and comfortable, it saves their time and e-books are searchable. This has helped the students to develop their understanding for

LATD. E-book increases their reading time and makes them read more books.

### 5.1.2 Students' Problem in Using E-book

Regarding with the research finding, the students have some problems when using e-book at academic level in IAIN Kediri. Although most of the students agree that it is more effective if they use e-book, however e-book also has disadvantages. The main problem is that using e-book can make eyes tired. Based on the finding of questionnaire and interview, this statement is the main point of the problem in using e-book. Besides that, there are several students prefer using printed book than e-book because e-book is difficult and leads to boring learning.

## 5.2 Suggestions

Regarding to the conclusion above, the researcher wants to give some suggestions to the teacher/lecturer, to the students, and the next researcher.

### 5.2.1 Teacher/lecturer

For the lecturer, the researcher suggests that the lecturer should give motivation and support to students in using e-book that it is more effective and efficient, exactly in LATD. Besides that, not only one lecturer who should know about the effectiveness if using e-book in the learning, but

other lecturers must know if using e-book is effective in learning, exactly at academic level in IAIN Kediri.

### 5.2.2 Students

For the students, the researcher as suggests that not only the lecturer who should know about effectiveness of e-book in the learning, but also the students should know how to use e-book efficiently for their learning process. Though, considering both the advantages and disadvantages, they must be taught about learning strategies if using e-book. It is because e-book just a tool to help them in learning English.

### 5.2.3 The next researcher

For the next researcher, the research suggests that this study is limited only for investigating perception of the students at academic level in IAIN Kediri. I suggest the next researcher has different subject. It mean that the limitation of the research is that it only reaches small subject in small university. The result of the research can be more credible if it enlarge to gain teacher's perception.
