CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the researcher presents the conclusion of discussion. In this part the researcher also give some suggestion for the English teacher, the students, and also further researcher.

A. Conclusion

The conclusion of this research is English Song is effective in teaching grammar (simple present tense) for the seventh grade of MTsN 1 Kediri. Researcher has calculated the mean of both experimental and control group before they get treatment. The score has calculated using SPSS, for experimental group was 61.55 and control group was 65.00. In addition, the mean score from both groups after they got treatment, for experimental group was 86.72 and control group was 81.72. Based on the mean score above, there has different mean between students from experimental group who taught using English Song and also students from control group who were not taught using English Song. The result of ANCOVA assumption showed that the first assumption the data of this research is normal distributed (0.200 > 0.05) and also (0.200 > 0.05). The second result of assumption is the Levene"s test that showed the significant value (0.640) > α (0.05). It means the ability between experimental and control group is almost the same and the data was homogeneous. The third assumption, there was also no interaction between covariante (pretest) and dependent variable, the significant

value was (0.362 > 0.05). The fourth assumption showed that there was also enough evident that there was linier relationship between covariate (pretest) and dependent variable (0.000 < 0.05). Finally, the result of ANCOVA showed the significant value lower than α (0.001 < 0.05). It means that there is enough evidence to reject the null hypothesis and accept the alternative hypothesis. All in all, the conclusion is English is effective in teaching grammar (simple present tense) for the seventh grade students of MTsN 1 Kediri.

B. Suggestion

Based on the research problem and data analysis the researcher would give some suggestion. Hopefully the suggestion will be useful for the teacher, students and also the further researcher.

1. Teacher

After finishing this research, researcher hopes that for an English teacher will give better teaching media for students during the teaching and learning process to make the students more interest and enjoy the lesson. In this way, students will have easy way to improve their grammar ability and also have better skill.

2. Students

Students have to know that English is important, so they have to keep improve their English skill, English component especially in grammar as English component. Better knowledge will bring better future for their life.

3. Further Researcher

During conduct this study, the researcher focus on conducting English song with the structure of verbal and nominal sentence on lyric song. For the next researchers who want to conduct English Song on their research, the researcher suggest that the next researcher could more focus on conducting English song where there is the structure of WH-Question on lyric song. So, the students also can learn structure of WH-question on some tenses especially simple present tense.
