

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter the researcher presents the conclusion of the discussion. In this part, the researcher also gives some suggestion for the English teacher, students and the next researcher to use Bamboo Dancing Method in teaching speaking skill.

A. Conclusion

From this study, the researcher found that the using of Bamboo Dancing Method in experimental class was to enjoyable situation in this class, the students freely communicated with each other and they were more enthusiastic when they were joining this class. The main factor that affects students' progress is the students' interest in the way of teaching given so that they were motivated to learn in the classroom. In this case, they are gained into some students of learning.

Based on the previous data analysis the researcher can conclude this study from the data. In pre test, the highest score of experimental and control groups are the same. That is 65. In addition the lowest score both the groups are 45. The mean score of experimental group is 53.00 and control group is 54.00. then the standard deviation of experimental group is 6.379 and for the control group is 7.240.

In post test, the highest score of experimental group is 95. Meanwhile the highest score of control group is 85. In addition the lowest both of the groups are 65. They got the same minimum score each group. For the mean score of both the

groups, experimental groups get 77.00 and control group get 73.83. It is so significant enough to compare both of groups' mean. From this we can conclude that using Bamboo Dancing Method is effective to teach students' speaking skill.

The objective of this research is to investigate the effectiveness of using Bamboo Dancing Method in teaching speaking skill. The result of the statistical computation of ANCOVA which is significant at (p) $.000 < .05$ level. Since the significant value shown by SPSS output smaller than $.05$ statically there is enough evidence to reject the null hypothesis, then the alternative hypothesis is received. It means that teaching speaking skill using Bamboo Dancing Method is effective.

B. Suggestion

Based on the research problem and data analysis, the researcher would like to propose some suggestions which hopefully would be useful for the English teacher, the students and the next researcher.

1. To the teacher

The researcher hopes that the teacher gives a better method especially when the teacher teaches speaking skill using Bamboo Dancing Method. Besides, the teacher should keep control to the students' activities and should present the language in an enjoyable, relaxed and understandable way.

2. To the students

The students have to improve their knowledge, especially in their speaking ability using Bamboo Dancing Method that can help them to improve their speaking.

3. To the Further Researchers

The other researchers are extremely encouraged to develop other researches related to strategy in teaching speaking. Bamboo dancing Method had the other part to be explored, thus it could be the next research or repetition strategy, which related to speaking strategy. By doing so, it is expected to achieve better outcome in English speaking class.
