CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the research presents conclusions and suggestion that is based on the research findings that have been discussed in the previous chapter

A. Conclusion

Based on the findings and discussions, the general description of the teaching learning process in IT for Study by using Edmodo in Universitas Nusantara PGRI Kediri.

In traditional English classroom, instructors have to spend time on writing the vital language points and important information on the chalkboard. In the multimedia classroom, the teacher can use the button and keyboard to show significant content in a few seconds as long as or she is familiar with the operation of the multimedia

The advantages of this program based on the teacher. (1) this website provide a lot of material and resources for teaching and learning process (2) Easy to upload and giving new material to the students (3) Can be accessed anywhere and anytime (4) This website does not need a class, so students will get the best opportunity to improve their skill which can not get in the large numbers of classroom (5) Teacher can handle post, quiz, assessment and forum discussion and share with students in real time.

The teaching learning process in IT for study by using Edmodo implements the method of contextual teaching and learning which used the

materials based on the real life in the teaching learning process in IT for study by using Edmodo in their activities in the classroom.

The problems that are found in IT for study by using Edmodo are classified as follows : 1. The problem of institution, the lack of facility. 2. The problem of the teachers is have jobs or busy off campus activities. 3. For the students the problem the constraint is the lack of smooth internet network.

The students' perceptions toward the use of Edmodo in teaching learning process in IT for study is very encouraged toward the use of Edmodo in teaching learning process in IT for study, because Edmodo is good application which can make our work easy and fast to finish. Besides that, Edmodo also help the students to study the material to be more interesting and colorful and in many kinds of forms, like audio and video.

B. Suggestion

Here, the researcher tries to give some suggestion bellow:

1. For the Writer

   This research can give more knowledge for her in implementing Edmodo in classroom activities.

2. For the Teacher

   This research is aimed to help teacher especially IT for Teaching teacher can increase the quality, give the motivation for the student, and can develop the E-Learning better. Thus, the teacher can make understandable by the learners.

3. For the Students

The students should have high motivation in studying and they need more practicing in English with their friends outside of class activity. Besides that, they should be able to take the positive thing form the growth technology and also the use of Edmodo in order to support their learninng

4.   For the Readers

It can give information about Implementing Edmodo and also can be reference for further research. This study is still far from being perfect in describing the use of Edmodo in the teaching learning process in IT for study because we know that the technology is always evolving very fast time to time offers good applications to support the teaching learning process in IT for Study.
