

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

This chapter present the conclusion and the suggestion of the research. The conclusion of this research is the answer's statements of the problem. The suggestion of the research is for English teacher, the students and the next researcher.

#### **A. Conclusion**

Based on the data analysis of the test, both two groups (control and experimental) have a different result. The experimental group have better score than the control group. This is because the experimental group have been given some treatments by using podcast media.

The researcher tries to prove the use of podcast media that effective in teaching listening. So at the first time, the researcher held a pre-test to the control and experimental group. After that, the researcher gave some treatments by using podcast to the experimental group, while the control group wasn't given treatments. And then, both of control and experimental group were given post-test, it aimed to know the score after being treatment. And the result showed that there was significant difference between control and experimental group. The significant differences from pre-test and post-test in experimental group is 0,000. And it was less than the significant value; 0,05. It can be concluded that teaching listening by using podcast media is effective to the first grade students of SMKN 2 Kediri.

## **B. Suggestion**

Based on the conclusion above, the researcher wants to give some suggestions for English teacher, students and the next researcher.

### **1. English Teacher**

As we know that being teacher isn't easy as we think. A teacher must know the desire of the students itself. Moreover, nowadays we're not strange with the technology. A teacher must adapt with the technology development. The teacher are supposed to have many knowledges, creativity, and innovation. Here, podcast is one of media that useful to be applied in teaching listening. It will make the students more interested and enjoy the teaching learning process. And ofcourse, the presence of podcast will influence the students' score.

### **2. Students**

This media can help the students in learning listening, easily. So, their listening score will be increased. Beside that, the students will be more interested in learning English.

### **3. Next Researcher**

The researcher hopes that the next researcher will conduct this media in other school and they can explore new method by using podcast. The researcher also hopes that the nest researcher can be more creative and has a new way or innovation in doing research.
