CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the research findings and discussion in the previous chapter, it can be included that the researcher describes the research findings in descriptive analysis of each data to describe how conversational Implicature are organized in *Sentilan Sentilun* Talkshow on Metro TV. In this research, the researcher found 17 conversational Implicatures of the utterances between Sentilan and Sentilun, and their guest stars. The researcher found 17 conversational implicatures from two episodes of *Sentilan Sentiun* Talkshow on Metro TV. There are 7 conversational implicatures from *Godaan Penegak Hukum* episode, it consists of 5 utterances which indicate the non-natural meaning and 2 utterances indicate the natural meaning. And 10 conversational implicatures from *Indonesia Damai* episode, it consists of 8 utterances which indicate the non-natural meaning and 2 utterances indicate the natural meaning. The theory used by the researcher to analyze the implied meaning in Sentilan Sentilun is theory initiated by Grice.

B. Suggestion

It is suggested to other researchers who wish to research implied meaning can use other suitable research object. Or if the other researchers want to analyze the same object with the researcher, other researchers can use

other theories as an example, the style of language. In addition, research of implied meaning can also use the object of conversation that happens everyday. And for the readers, the readers can enjoy the story increase critical readings which is sensitive and how language is used.
