

CHAPTER III

RESEARCH METHOD

This chapter discusses the research type, research design, the role of the researcher in the study, research site, the source of the data, the data collection procedure, the data analysis. And the last is the method for verification of the research finding.

A. Research Design

Design of this research using descriptive qualitative research. According to Donald Ary (2015 : 640). This research descriptive nature of the incident about ask a question or the distribution of variables involving the depiction but not manipulate the data that has been provided. This study suggests something that is natural and can only be measured using existing data. There are several why researchers using qualitative methods, ie, the first collection of data in the form of description and explanation. And the second data collection using slang as they appear in the screenplay "The Boss Baby" as the analysis of the data because it is thus selected to produce the findings.

B. Research Type

In this study, the authors use a document or content as "analysis of the material after communicated (such as a book or media) through various kinds of classification symbols and finding to ensure meaning and effect". But the

roots of this analysis can be studied more deeply. Namely the use of sounds and symbols, especially writing.

C. Role of the Research Instrument

One feature of the qualitative research is a method of collecting and data analysts. In this study, researchers as a means of gathering such data based on the viewpoint of researchers and experts in the related theories used and applied by the author.

1. Research Site

In this study was a movie entitled THE BOSS BABY in the form of soft file the object in this study was the slang term used in this movie. THE BOSS BABY is an animation movie of the American movie that released on 15 to October 2016. Its Length is 1 hour 37 minutes.

2. Source Of the Data

In this study, the authors used script THE BOSS BABY as a source of data to be retrieved. THE BOSS BABY is an animated American. In the film contains many slang terms are unknown people who have to watch this movie at the cinema or on the television. Analysis of data taken from this movie is a vocabulary of slang and idioms spoken by all the characters contained in the making of the film.

3. Data Collection Procedure

To collect the data, the documentation used it as the instrument.

The techniques of the data collection through Several steps are as follow:

- a Watching "BABY BOSS THE MOVIE" several times to know all of the stories of "THE BOSS BABY MOVIE".
- b Collecting all of the fast and furious Dialogues in the form of English subtitles Become the data in the form of a script.
- c Identifying the English subtitles in the form of dialogue to find a slang word and phrase. The writer used some slang dictionaries to identify the slang word and phrase when Compared it with Indonesian subtitles.
- d Classifying all the slang words and phrase which are found in the movie. It is classified into the kind and meaning of slang by using some of the slang dictionaries.

D. Method for Verifivation of the Research

Verification of the research is the most important thing from this study. So this requires research to verify the validity of the research that has been made. The collection of data must be collected by the fact, that as evidence that this research was made valid and responsible. The data that has been created will be checked through the next stage, namely the triangulation stage. According to Moleong (2005: 330) states that data triangulation is a technique used to check the validity of using something else outside the data for checking and

comparison of data that has been found by the owner. In this stage, the researcher collects data on the slang word found in the movie THE BOSS BABY. The collected data is included in the table provided based on the shape and type of the hose, henceforth the data will be rechecked by the triangulation lecturer. In the final stage of checking everything that has been done by the triangulation lecturer, the triangulation lecturer will sign the letter that has been given.
