ABSTRACT

Nurrohmi, Eny Laili. 2013. *The effectiveness of Teaching Speaking English Using Newspaper Picture for The Second Grade of SMP Muhammadiyah Kota Kediri*. English Department faculty of Education State Collage for Islamic Studies (STAIN) Kediri 2013. Advisors 1) Ary Setya Budhi Ningrum, M.Pd. 2) Mohammad Muhyidin, M.Pd.

Key word : Teaching Speaking, Newspaper Picture, Speaking Skill.

Teaching speaking in the class is very importance to do because it becomes habitually and train how to speak English well. This research tries to investigate the effectiveness of using newspaper picture on the improvement of the students' speaking skill of SMP Muhammadiyah kota Kediri. Teaching speaking is important for junior high school to be able to participate in the winder world of work. The speaking skill is measurement in terms of the ability to carry out a conversation in the language. This reality makes teachers and parents think that speaking should by mastered by their students and children. But in fact, speaking is the difficulties to be learned and kind of productive skills which should be practice. Based on the reason, teaching speaking has been needed to get more intensively in learning at the class. Finally, by having many activities which has already and the researcher had chosen newspaper-picture activity, the students would experience something new.

The research design used in this study is quasi experimental by comparing two groups of the study. Experimental group and control group, in every group consist of 35 students. The experimental group was taught by using newspaper picture and control group was taught conventionally. Before and after doing treatment, the researcher gave the test to students in both groups, those are pretest and posttest. The result of the test was analyzed by ANCOVA.

In order to know the effectiveness of teaching English using newspaper picture for the grade of SMP Muhammadiyah Kota Kediri, the value of F empiric compare with the value F theoretic withe the degree of freedom (df) 67 at 0.05 alpha (2.63). From the result, we know that the F observed is higher than the f-table ($7.28 > 2.63$) so we have enough evidence to reject the null hypothesis. It means that the students who were taught by newspaper picture get better score than those who are taught without newspaper picture.

Based on the result of the test, the researcher concluded that using newspaper picture in improving the students' speaking skill at SMP Muhammadiyah Kota kediri is effective. The researcher suggests to the teacher to use this media as alternative in improving students' speaking skill.
