

CHAPTER V

CONCLUSION AND SUGGESTION

After analyzing the obtained data in the previous chapter. The researcher makes some conclusion and suggestion as the last parts of this writing

A. Conclusion

Based on the finding explained the writer concludes that most people at setonobetek market use *ngoko* and *madya* level in their transaction. It is because that the people who come at Setonobetek from many varieties. and the seller use language politeness according to the interlocutors. Besides, They use *ngoko* because they wants to lessen the distance between interlocutors and they usually meet at same place, it is too formal if they use *madya* or *krama* .

Most people at Setonobetek market did not understand about original *krama*, they just mix between *madya* and *krama* in transaction and sometimes they use *ngoko*, *madya* and *krama* according to interlocutors. They use Javanese language to give respect to other.

Furthermore, only some of them who are from middle and high class use *madya* or *krama* to preserve their culture and language.

The writer concludes that not all of the conversation in transactions at Setonobetek Market fulfill the theory of Leech maxims. Because the purpose of a seller are drawing attention so that a customer buy the things. So most of seller at Setonobetek Market using sympathy maxim to drawing attention the

seller.

B. Suggestion

Related to the finding and discussion of the study above. The writer would like to give some suggestion.

1. People at setonobetek market should use language politeness levels. It is useful to respect to interlocutor. Besides, The using of language politeness can give the knowledge to youth to speak politely and keep our culture.
2. The writer hopes that this study can give a contribution to the further study. The writer expects that the next study will talk more about other side in language politeness that the writer does not investigate yet.
