

## CHAPTER V

### CONCLUSION AND SUGGESTION

In this chapter, presents the conclusion of the study and the suggestion for the English teacher, students and the next researcher.

#### A. Conclusion

The objective of this research is to know wheter the students who are taught using English song have better vocabulary mastery than those who are not taught using English song. This study revealed that there were significant differences in the fluency of mastery of vocabulary using English songs using audio as a learning medium better than just using the text of English song lyrics as a learning medium for students at SMPN 1 Pagu.

Based on ANCOVA output, the results showed that there were significant differences between students taught using English songs as medias using non English songs but only song lyrics performed at SMPN 1 Pagu.

The results of ANCOVA calculations statistically show that the significance is 0.00. Less than 0.05 ( $0,000 < 0,05$ ). This means that using English songs as a medium in teaching vocabulary mastery is effective. From this result, enough evidence to reject the null hypothesis. This means that teaching vocabulary using English English songs as an effective medium for teaching vocabulary mastery for class VIII SMPN 1 Pagu.

## **B. Suggestion**

Based on the conclusions above, researchers want to give advice to English teachers, to students, and to the next researcher.

### 1. For English Teacher

Based on the conclusions above, researchers want to give advice to English teachers, to students, and to the next researcher.

### 2. For the Students

Students must pay attention to the teacher when he gives English lessons. students still need to study harder about vocabulary, especially related to grouping word classes.

### 3. For next researcher

They can make this study as their reference to conduct other researcher on the same field. They are also expected to be able to cover the limitation about that, they can conduct a researcher with the same media but in different genres. The writer hopes that the next researchers can prepare everything as good as possible in doing research and can follow up this research.
