CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter focuses on conclusion and suggestion. The conclusin based on the analyzhing the data and the statement of problem. The suggestion are given tothe next researcher in doing mimiliar research.

A. CONCLUSION

Based on the research problem, purpose of the research and finding of the research, it can be conclude as follows :

The verbal text is the text which appears on the picture could be a word, clause, phrase, & sentence and the visual is all the post from the background until the written text on the post. In this research about Korean meme analyzed by Semiotics theory of Roland Barters's the researcher found the denotative and connotative meaning in meme. The denotative meaning had close relationship with signifier and signified. In this research the writer could find all denotative and connotative meaning containing in the Korean Meme. In this research there was denotative and connotative meaning and also represents mening in each meme.

B. SUGGESTION

Based on the conclution of this researh, th researcher would like to give some suggestions as follow :

1. To the lecture

    a. The lecture should give explanation to the students in order to make them understand about study semiotic.

    b. The knowledge about semiotic becomes important knowledge for tthe students. Therefore, the lecture should give knowledge about the way to give meaning in every codition by using semotic analysis.

    c. It will better for the lecture if they use the Roland's theory when they teach about semiotic. Therefore, they can apply denotative and connotative meaning when explaining the topic to the sudents in giving example.

2. To the students

    a. Thestudents should learn about semiotic. Therefore, they will know about the good way to give meaning in every condition wth their frirnds or their lectureres.

    b. The students should gve many opinion when they interpret the condition or image by practicing kinds of meaning of the semiotic i order to increase their knowledge abut semiotic.

3. To the next reder

    a. The next researcher can conduct the research about semiotic by selecting planning better than before to get the better result.

b. The next researcher can conduct the reseach further, deeper and more comprehensive in analyzing semiotic in meme.

This research focuses on semiotic analysis on Korean Meme. It will become enrich the knowledge for the next researcher by giving benefit and more information about the study of Semiotic especially in denotative and connotative by using Roland Barthes' theory. From this thesis, the researcher realizes that, this research is far from the perfect work because of her limitation in order to conduct the research. Hopefully, the next researcher can enrich more in about Semiotics.
