

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

From the result of the research, we can conclude that the use of animation video can improve vocabulary mastery of third grade students of SDN Nambaan 1 Kediri. Because, in English vocabulary is important. If students know vocabulary so the students can improve the skill of English as like reading, writing listening, and speaking. And there are many strategy and media that can used by the tacher to teach English . one kinds of media is animation video.

In cycle 1 , the method that used by the researcher had been success but the achievement of students had been optimal. Because there are many students that still wrong to answer the question and do the duty from the researcher but the score of the some students still above the minimum completness criteria with the result of the test I mean is 70.2 and the mean of test II is 83.5.

From the result of cycle 1, we can conclude that the implementation of the research is success and the students achievement also increase so the researcher does not need to conduct cycle 2. It means that the use of animation video is sucess to improve students vocabulary mastery.

**B. Suggestion**

In globalisation era, education world also have some changes. So the teacher must be creative to teach their students. This is aim to improve the interest of the students to learn. Because in this era, if teacher not have learning method that can make fun, it can make the interest of students less and make the students fell bored to study. By implemented learning method that fun, so the students will be interest to learn so their knowledge can increase too. So, in this era teacher must prepare the creative and inovative method.
