

## CHAPTER V

### CONCLUSION AND SUGGESTION

This chapter presents conclusion of this study and suggestion for the teacher and the next researcher.

#### A. Conclusion

There are three points that can be concluded from this research. First, the students' speaking skill in the classroom presentation. Second, there are some factors that influence the students' speaking skill in the classroom presentation. Third, there are some techniques that the students use in their presentation.

First, the average score of the students' speaking skill in the classroom presentation is 60.72. The grade of the students' speaking skill in the classroom presentation is low. Second, it influences by some factors, they are: the students are not confident before presentation, the students do not practice, the students the students just memorize the material, overview of the students feel nervous before presentation, the students less of confident that their presentation is successful. Third, there are some techniques that the students use in their presentation, they are:

1. Use quotations to strengthen the delivery of presentation.
2. Mastery the material of presentation, mastery the studentselves and mastery the audience.

3. The delivery of the material. There are some five points. They are assure the audince that the material that the students deliver is useful for them, use intonation and a exact choice of words, emphasize the important part by delay the tone of voice, repeating sentences and provide confirmation, and adjust the language to the audience.
4. Use non-verbal language appropriately : speech articulation, variation in tempo, tone and volume, facial expressions, body language, posture.
5. Using appropriate body language.
6. Give questions in their presentation. In this item there are two points that the students use. They are give questions that stimulate the interaction of audience, look at the silent audience.
7. Show the facts to support the topic of presentation.
8. Invite the audience to action immediately.
9. Make a conclusion in a closing sentence.

#### **B. Suggestion**

Having concluded the result of this research, the writer would like to propose some suggestions that hopefully will be useful, especially for the students and the other researcher. It is suggested that the students should prepare all of thing that needed before presentation included the material and self preparations. Because they are the important thing in the presentation. The students also should gave attention to the voice, words, and body language because they are the important thing that can be influenced in their presentation. The students should

practice as much as they can. Aphorism says that "*Practice make perfect*", so does presentation. By doing much practice, the students can produce good presentation. The students have to manage the feeling of worried and afraid when they presentation, in order that the material that has been studied by them did not lost. So they can speak fluently. For other researcher, the result of this study could be used as an additional reference when they want to do analize in another form of presentation. not only for a mubaligh. It could conduct the research in another forms as news reader, tour guide, etc.
