The subjects of study are the students of English Department in academic year 2015 or students of the fifth semester who were taking advanced speaking class. The researcher distributes the questionnaires to 120 students and interviews 20 students. This study used descriptive qualitative as research design because there is no treatment. In addition, the instruments used observation, questionnaire, interview guide and then the researcher analyzes the data by using frequency of the students.

The result of the study shows that there are many problems faced by the students in speaking. The most difficult problems faced by the English Department students are limited vocabulary (73,3%); they have difficulty in expressing certain ideas. The second is grammar (62,5%); the sentences they produce are mostly grammatically incorrect. The third is pronunciation (50%); they frequently produce certain English sound incorrectly. In addition, the students also have some problems in bravery, motivation, confidence, be active in the class, fluency, method of language teaching, environment. Based on the problems, there are some ways or efforts which have been given by the students and the lecturer's solution. The students' ways are memorizing vocabularies using any methods, reading grammar books, conducting discussion, sharing each others, listening western music, watching western movies and making small group study. In addition, the lecturer also gives solutions to improve students' speaking skill as practicing the some skills as reporter, tour guide, news anchor, practicing their speaking in conversation dialogue, ordering students to speak up English in small group and giving motivation to students after finishing the class.
