ABSTRACT

Lutfiah, Ayudia Rosaliani, 2016. *The Effectiveness of Using Stand Up and Sit Down Game to Improve Vocabulary Mastery of The Second Grade Students of SMP Muhammadiyah 2 Kediri.* English Department, Faculty of Education, State Collage for Islamic Studies (STAIN) Kediri. Advisor 1) Dr.Mukhammad Abdullah, M.Ag 2) Dra. Nurul Ain, M.Pd.

Keywords : teaching, vocabulary, *stand up and sit down game*

Teaching is the process of delivering the material to add the students' understanding to the project by using the media and others to suggest. Vocabulary is very important part of learning English. Vocabulary is more than word. A person's vocabulary certainly consists of words and meanings. The words in your vocabulary are those you understand and use. The researcher use *Stand Up and Sit Down Game* for teaching vocabulary to improve the students' vocabulary ability. A vocabulary game where students have to mention the meaning of the word.

The student's vocabulary mastery before being treated with Stand Up and Sit Down game it can show from the interval score of pre-test experimental group shows that 7 students or 25% get score of 0-45 they are in worse level, 4 students or 14% get score of 46-55 they are in bad level, 11 students or 39% get score of 56-65 they are in fair level, and then 5 students or 18% get score of 66-79, they are in good level. The last, 1 student or 4% get score of 80-100. On the other hand, at the control 1 student or 3% get score of 0-45 she is are in worse level, 11 students or 30% get score of 46-55 they are in bad level, and then 20 students or 56% get score of 56-65 they are in fair level. The last, 4 students or 11% get score of 66-79, they are in good level.

The student's vocabulary mastery after being treated with Stand Up and Sit Down game it can show from on the other hand, the interval score Post-test of control group shows that 5 students or 14% get score of 46-55 they are in bad level, 21 students or 58% get score of 56-65 they are in fair level, and then 8 students or 22% get score of 66-79, they are in good level. The last, 2 students or 6% get score of 80-100 they are very good level. On the other hand, the interval score of control group shows that 5 students or 14% get score of 46-55 they are in bad level, 21 students or 58% get score of 56-65 they are in fair level, and then 8 students or 22% get score of 66-79, they are in good level. The last, 2 students or 6% get score of 80-100 they are very good level.

Statically there was enough evidence to reject the null hypothesis, the alternative hypothesis was received. It means that the students who were taught by using *Stand Up and Sit Down game* had better vocabulary mastery than the students who were not taught by *Stand Up and Sit Down game*. Therefore, it can be concluded that Stand Up and Sit Down game is effective in teaching vocabulary for students' SMP Muhammadiyah 2 Kediri. In this research, this method can improve the students' vocabulary mastery, too.
