CHAPTER V

CONCLUSION AND SUGGESTION

This chapter consists of two parts. The first part is about the conclusion of the research. The second part provides some suggestiosn related to this study from students using ChatGPT and for future researchers.

A. Conclusion

Using ChatGPT for learning activities has positive impact on students in their learning behavior. Using ChatGPT can increase their knowledge and make them think critically because they do not copy and paste the responses from ChatGPT. Students also feel confident when they use ChatGPT, and makes them brave when giving an argument. Students feel many benefits that they use ChatGPT to support their learning activities but they also have worries while using ChatGPT because ChatGPT doesn't have an accurate source. While students use ChatGPT they do not abandon learning behaviors like reading books, studying before exams, make notes when the lecturer explain because they use ChatGPT to support their learning activities.

B. Suggestion

The researcher provides some recommendations for some parties. The recommendations are for the students and also for future researchers.

1. Students

   ChatGPT gives much benefit for students in educational activities, as students who using ChatGPT must be able to be responsible and ethical

when using this technology to continuously improve their knowledge, and also students must be careful when using ChatGPT.

2. Teachers

   ChatGPT can support students in learning activities, as a teacher should give many motivation to students they should use technology as wisely as possible.

3. Future researcher

   For future researchers can conduct future research on the limitations of using ChatGPT, considering the ethical aspect, also data privacy when students use ChatGPT in their learning activities, and also the next researchers can use tests to measure the impact of using ChatGPT.
