

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, it contains about the research closing that consist of conclusion and suggestion of the research. Those topics will be discussed deeply in this chapter as an information related to the research topic in this writing.

A. Conclusion

From all the things that had been done in the research, speaking ability is the most important skill among the other English skill. This because speaking is actually an indicator of a person that has a good skill in English. Role play is one of other method that can be used for speaking ability in English that used a movie scene media as the material of the research. This method demands the students to train their speaking ability with imitating method from the movie scene that had been provided.

Based on this study, using imitating movie scene to improve speaking ability of XI-2 Class at SMAN 8 Kediri was successfully made it. According on the data of the action session, the Test 1 showed that the students score percentage was 23,6% and then it shows that the percentage result of the students was improved into 31,6% from Cycle 1 that was conducted. The score of the students was still not enough for the standard pass so the Test 2 was conducted due to the students score. In the Test 2, students showed a great adaptation which created better performance and better score that achieved 47,3% which still need an improvement in the Cycle 2.

In the Cycle 2 from 38 students that passed the cut score (KKM) it increased into 76,3%. It can be concluded that the students were having a good improvement after two test and two cycles that had been conducted. According to the SMAN 8 Kediri English teacher, the success percentage of the learning activity is 70% which is in this Cycle 2 the students of class XI-2 succeed to achieve the percentage of the learning activity using imitating movie scene method.

B. Suggestion

With the results from the research that had been done, in addition to drawing conclusions, of course the researcher also has various suggestions for further research and also for English teachers at the school:

1. For Students

Any kind teaching method that given by teachers, it would be great to stay being active in the learning, enthusiast and never give up on learning. It would be good that consider the method as a good skill for future. And for all students, respect your teacher because teachers at school are also a good role that could change our life to be better in the future.

2. For English Teachers

It is suggested to English teachers to occasionally try to use imitating movie scene role play as a method to teaching speaking learning activity for high school students. Imitating movie scene method turns out was effective and it made the students got adapted well in a speaking habit in English to train their speaking ability. In addition, students also feel excited and enthusiast by using this imitating movie scene method because it turns that the students were more excited a learning that involves the physical movement and shows.

3. For Researchers

It is suggested to future researchers that they can use imitating movie scene method to improve students' speaking ability, because the researcher only observes a small part of the speaking components related to the imitating movie method that contains the content and the use of the language in speaking. And the researcher hopes that the next researchers will be able to further develop this method.

The results of this study can also be used as additional references or further research with different discussions for future researchers. The researcher hopes that this research can be useful for English teachers and further researchers also everybody that involved to this research and the research topic.
