

## CHAPTER V

### CONCLUSION AND SUGGESTION

This chapter present the conclusion of the disscussion in the past chapter andthen give some suggestion for the readers.

#### A. Conclusion

Generally, from the data for appropriated this 2013 curriculum English textbook for eight grade students it is about 2, 81 it is the average of total point from 5 point of view in this analysis The diagram of all the points is;

From this diagram the 2013 Curriculum English textbook has one points from fifth points, the less point are using appropriate are interesting illustration still make students feel lazy to open their book and also has to exploring again about the matter, and need more explanation to their teacher. The teacher still needs more resources, have more strategy to make students being active in the class and be enthusiastic to studying English, also to improve their students known

The presentation of this analysis is calculated by the formula:

$$= \frac{\text{Total point 1} + \text{point 2} + \text{point 3} + \text{point 4} + \text{point 5}}{\text{Total of point}}$$

$$= 2,925 + 2,703 + 2,875 + 2,714 + 2,833 / 5$$

$$= 14,05 / 5$$

$$= 2,81$$

While about the categories of the result is as follow:

SCORE	CATEGORIES
3, 1 - 4	Very Good
2, 1 - 3	Good
1, 1 - 2	Low
0 - 1	Very Low

And that average is 2,81 and based on the categories below that, **“the use of English text book using 2013 curriculum is appropriate with the students’ need at a good level”**.

## **B. Suggestion**

At the end of this study the researcher would like to give some suggestion to the teachers, students, and researchers.

### 1. Teachers

The study is expected to make the teachers to be more careful and selective in choosing textbook which are appropriate to requirements in the 2013 curriculum as the new curriculum of Indonesia. Besides that, the teacher should be used another book, not only in one reference to make the students interested to be active participants in the class and to improving student knowledge.

### 2. New researcher

The last for the next researchers, this analysis is not perfect, so the researcher hopes that the next researchers can make improvement.
