

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents the conclusion of the presentation of the research findings that are stated in the previous chapter. It also presents the suggestion to the several parts relating to the teaching learning process especially on English class.

A. Conclusion

Before doing this research, researcher had interview with the English teacher and wants to know about the criterion of minimum score on English subject. Besides that, researcher asks how the teaching and learning process, is going on. From the result of pre-interview with teacher from Arunsat School researcher choses Student Team Achievement Division (STAD) to improve English subject especially in grammar skill.

From the research problem "Can Student Team Achievement Division (STAD) technique develop students' grammar ability in the seventh grade of Arunsat Vittaya Kadunong Saiburi Pattani South Thailand?" researcher successes to improve grammar mastery using STAD method and the research problem can be solved with this method. It can be seen if researcher has two cycles to get criterion of success in this research. In cycle one just 9 students pass the minimum score (45%). It means that 65% students do not get success and the average score is 2.75. But in cycle

the researcher got the improvement data of students result in individual quiz. The result of the students score in cycle two shows 90% of the students (18 students) pass minimal score of criterion of success. The average score is 3.45. The criterion of success is 75% and the minimal score was 2.5. So, the researcher was succeeds to improve English subject especially English grammar using STAD method.

B. Suggestion

After doing this classroom action research and knowing the result of this research, the researcher has some suggestions for teacher, students and to the next researcher:

1. For the Teacher

- a. In teaching and learning process especially in English subject teacher can use STAD to improve the students' grammar mastery.
- b. In every teaching and learning process, teacher must be give some motivation to students, so that they feel motivated to study hard.

2. For the Student

They have an opportunity to get better score in English subject, so students must know about English lesson and they can be good in English if they study hard especially in grammar skill.

3. For Further Researcher

For the next researcher, Students Team Achievement Division (STAD) can be the reference to conduct another research especially in Classroom Action Research. Next researcher can use this method in other English skill.
