ABSTRACT

Hidayati, Nurul. 2017. *The Effectiveness of Using English Song to Increase Vocabulary Mastery of the Eighth Graders of MTs Darussalam Krempyang Tanjunganom Nganjuk.* English Department Faculty of Education the State College for Islamic Studies (STAIN) Kediri 2017. Advisor: (1) Dr. Toyyibah, SS., M.Pd. (2) Drs. Agus Edi Winarto, M.Pd.

Key Words: *The Effectiveness, Vocabulary, English Song.*

Vocabulary is all the words that a person knows or uses. Without vocabulary, we cannot know everything about English. Vocabulary is very important for the students who learn English as a foreign language. Because of that, the teacher should be creative and innovative to find out the strategy in teaching vocabulary in order to make students feel fun and enjoy in learning English. Song as media in teaching vocabulary mastery is one of the strategy that can be applied to make the students more active and increase their vocabulary easily.

The objective of this research is to know whether the students who are taught using English song have better vocabulary mastery than those who are not taught using English song. In order to achieve the objective of research, the research design is an experimental research. The subject of the research is the students at the eighth grade of MTs Darussalam Krempyang Tanjunganom Nganjuk. The research design is quasi-experimental design. It is done by comparing two groups, experimental and control groups. Every group consists of 37 students. The experimental group is conducted at class VIII-A who were taught using English song as media and control group at class VIII-B who were taught without using English song. In this study, the researcher gave pre-test and post-test to both experimental and control groups. Then, the result of the test was calculated by using ANCOVA through SPSS 21.0.

In the result of pre-test, the mean score of experimental group is 62.83 and control group is 66.08. In the post-test, the mean score of experimental group is 77.70 and control group is 71.21. Based on the data analysis, the result of statistical computation of ANCOVA reveals that the significant at $p(0,00) < \alpha(0,05)$ statistically, there was enough evidence to reject null hypothesis, then the alternative hypothesis was received. It means that the students' who were taught by using English song as media got significantly better vocabulary mastery than the students' who were not taught by using English song. Therefore, the hypothesis "Teaching vocabulary by using English song as media to improve students' vocabulary mastery is effective" is accepted. Based on the result of the test, the researcher concluded that using English song as media is effective to improve vocabulary mastery for the students' of eighth grade of MTs Darussalam Krempyang Tanjunganom Nganjuk. The researcher suggests that teachers use this strategy as an alternative in improving vocabulary mastery.
