

## CHAPTER V

### CONCLUSSION AND SUGGESTION

This chapter is the last part of this Classroom Action Research's report. Conclusion relates to the problem of the research an also to the objective of this research that is about **“The Use Of Inside-Outside Circle Method To Improve Students Speaking Ability Of The Seventh Grade Students Ofmts. Darussalam Tulungagung”**. Meanwhile, the suggestion is based on the research finding and conclussion of this research.

#### A. Conclusion

We know that the young leraners prefer study while playing. They can enjoying the study while interacting with their friends. They like teaching English through Inside-Outside Circle because they can study together with their friends, and solving the problems together. They also getting some new vocabularies and new information or knowledge one and each other. The researcher choose this method and success to improve the students' speaking skill in teaching English.

Amount of the students get good score increase in cycle 1 is 10 students, and 6 students got score less than 7.0. It is better on cycle 2 when 13 students got score more than 7.0 and 3 students got score less than 7.0.

#### B. Suggestion

Here, for the firstthe researcher tries to give some suggestions for the English teacher. The teacher needs variation in teaching to make students fun and enjoy in learning English. The researcher suggested to apply Inside-Outside Circle as one of the techniques in teaching English. By applying this strategy, theteacher not onlycan improve the students' speaking skill but also make the students become more communicative and be able to share their own knowledge with their friend in group

or entire the class and make the teachinglearning process become more attractive to avoid the students feel bored duringthe class.

The second is for the students. The students should not be afraid to practice English. The students should have high motivation in learning English because the method is simple and interest for the students.

And for the researcher, it is hoped that the researcher will apply the Inside-Outside Circle in other place. Because this method appropriate and acceptable to learning English. This method also used for the other skill. This method also useful to improving reading and writing comprehension.
