It is need ability to analyze contain of some stories, for this case the writer gives some suggestion that probably meaningful. They are for university and for the next researcher.

For university, the writer suggests adding some book or some sources which have related with the literature, especially about the religious story. Because we can learn from the story of the best people in the past, we can learn from their experience and we can follow their struggle in life and keeping their belief toward God.

For the next researcher, the writer aware that this thesis so far from perfect ness. So based on the some weakness that get in this thesis, the writer hope the next researchers can make the better one. Then become the best next generation of Islam who able to keep their belief and their struggle in the future.
