

CHAPTER VI

CONCLUSION AND SUGGESTION

This chapter consists of two subs, they are conclusion and suggestion. Conclusion refers to the revealed points that have been gained through all the process of this thesis. Meanwhile, the suggestion is an advice of the researcher to those who will conduct the similar research.

A. Conclusion

This study reveals four underlying points. they are

1. The lecturers' perception on students' speaking problems consist of lack of knowledge, environment support, and language anxiety.
2. The students' perception on their speaking problem includes lack of vocabularies, self-confidence problem, grammar understanding, difficult to transfer the first language to English, no English environment, and pronunciation problems
3. The English camp activities that solve the students' speaking problems are English area/English Day, Vocabulary memorization, Punishment, Follow-Up Forum of introduction, Movie review, Debate simulation, Literature circle and final explanation.
4. The contribution of English camp in solving the students' speaking problem can be formed as English environment, Self-confidence boosting, Vocabularies Enrichment, Public speaking practice, and Motivation of learning

The existence of this study significantly updates and confirms the previous similar research on the implementation of English camp in enhancing the students' speaking skill through the various speaking activities. Moreover, this study also adjusts the previous study that is not yet touching the contributions of English camp in solving the students' speaking problems.

B. Suggestion

For Further research on the similar topic, it needs to focus more on the English area implementation by doing much more interaction with the Camp participants and the committee as the stick holder of the agenda. By this, the next researcher will directly experience on how this English area improves and enhances the students' speaking performance through his or her own view.

Some similar researches on English camp (more specific case on English area or English day) are needed. The different object of the research may implicate on the different implementation of this English area, thus, The more similar research are done, The more frameworks of English area will exist and support one another.
