

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter describes the conclusions of the research and also discusses suggestions that may be useful for English teachers and other researchers.

A. Conclusion

Based on research that has been carried out between cycles 1 and 2 that has improved student vocabulary is in cycle 2, where 80% of students get an average score of 76. Which cycle 2 has reached the success criteria set by researchers, namely 75% of students get a score of 75. So this research has answered the problem of study, that the Duplingo application can increase student vocabulary. From the results of the vocabulary test in each cycle, it is concluded that the Duolingo application is proven to improve vocabulary. The application of Duolingo application in the classroom can make it easier for students to learn vocabulary. In addition, the way to use the Duolingo application is very easy, first students only need to download the Duolingo application on their smartphones, then they can start working on the questions in the Duolingo application. The teacher asks students to discuss with friends to make it easier for them to solve the questions in the Duolingo application. Based on the explanation above, it can be concluded that Duolingo is one of the effective media in vocabulary learning for beginner level students. It is quite interesting for students because they show a very good response to this media, they easily understand the material.

Duolingo can eliminate boredom in learning and also encourage them to come up with new ideas in learning.

B. Suggestion

The results showed that the application of Duolingo game can improve students' vocabulary mastery. Therefore, the following are the suggestions offered:

- For teachers

Teachers can use the Duolingo application as a learning medium to improve students' vocabulary. With the Duolingo application, students will be more assisted in the learning process, especially in terms of learning vocabulary. The use of learning media can also increase students' interest to be more enthusiastic in learning.

- For other researchers

It is recommended for future researchers to use this study as information to develop this topic more widely. In order to motivate students' interest to improve their vocabulary better.
