CHAPTER V

CONCLUSSION AND SUGGESTION

Based on the review and explanation in the previous chapter, in this chapter the researcher presents the conclusion and suggestion.

A. Conclusion

By the explanation of the research findings, the researcher concludes that politeness strategies by Brown and Levinson were applied in a talk show program *Face 2 Face with Desi Anwar*. The guest of this talk show is Nadya Hutagalung. The politeness strategies which are analyzed are bald on record, positive politeness, negative politeness and off record strategy.

Then the researcher is interested to know how both of them were using politeness strategies by Brown and Levinson in their conversation during the talk show. The findings show that there are 69 utterances found in the talk show program which applied the politeness strategies. There are 4 utterances are used in bald on record. For positive politeness strategy 49 utterances are used. Then in negative politeness strategy there are 9 utterances are used, and for off record strategy there are 7 utterances.

The result of this study is politeness strategy that is most frequently used by the speaker during the conversation is positive politeness. The speaker mostly used positive politeness in situation when attends to the hearer's interest. In this situation the speaker is interested to know more about the hearer and her activities. Positive politeness is mostly used because both of them are not really close so they try to be closer. Also, by using positive

42

politeness strategy, the speaker tries to minimize the threatening acts to make the conversation became natural even they are not close friends.

By using positive politeness strategy, the speaker shows that the hearer is engaged with her during the conversation. So the speaker can save the hearer's positive face. In positive politeness strategy the speaker tries to minimize the distance between her and her guest so the potential of making the threat is small.

B. Suggestion

In this part the researcher makes some suggestion based on the research of politeness strategies. First for all of the readers the writer hopes that the readers would get more knowledge about politeness strategies and apply them in the daily life.

Then for the next researchers the writer hopes that this research could be one of the references of their research. And also the writer suggests to the next researchers who are interested to conduct an analysis about politeness in deeper analysis. The writer also suggests analyzing politeness strategy in another field beside in the talk show.
