CONCLUSION AND SUGGESTION

In this chapter the researcher present the conclusion to answer the statement of the problem and suggestion for the English teacher, students, and the next researcher to use *CIRC* in teaching reading skill in English.

A. Conclusion

The objective of this research was to know the effectiveness of *CIRC* on the improvement of student reading comprehension. The result of the statistical computation of ANCOVA which was significance at $(p) .000 < 0.05$ level. Since the significant value shown by SPSS' output smaller than 0.05, statically there was enough evidence to reject the null hypothesis, than the alternative hypothesis was receive. It means that the students who were taught by using *CIRC* have better achievement in reading than student taught without *CIRC*. Therefore the hypothesis “*CIRC*, is effective increasing students' achievement in reading comprehension at second-year student of SMP GUPPI Kunjang Kediri” was **accepted**. It means that *CIRC* effective to improve students' achievement in reading comprehension at the Second-year of SMP GUPPI Kunjang Kediri.
