

## CHAPTER V

### CONCLUSION AND SUGGESTION

In this chapter, the researcher presents the conclusion of discussion. In this part, researcher also gives some suggestion for the English teacher, students and also further researcher.

#### A. Conclusion

The conclusion of the research is Vlogging is effective to increase students' speaking ability for eleventh grade of SMKN 1 Ngasem. Based on the mean score, there has different mean between students from experimental group who taught using Vlogging and also students from control group who were not taught using Vlogging as a teaching strategy. It can conclude that students who got Vlogging as a treatment got higher score than those who were not.

Although Vlogging is effective to increase students' speaking skill, there are some advantages and disadvantages using Vlogging to teaching speaking skill. From the research, the researcher get some advantages, the first is the students more confidence to speak in front of class, because they are must be perfect in front of camera that which will be seen by many people on social media, secondly, the students feel happy because the strategy are fun and enjoy to them, they are more excited to apply the strategy, the third, this strategy is applied outside the classroom, so the students do not feel monotonous and bored. Besides have some advantages, this strategy also have some disadvantages, the first is several students are shy because they

never speak in front of camera, secondly, they do not focus on the topic because they enjoy the view outside the classroom too much.

Based on the explanation above, the result of analysis in this study shows that the students who were taught using Vlogging have better speaking skill than those who are not taught by Vlogging, and the conclusion is Vlogging is effective in teaching strategy to increase students' speaking ability.

### **B. Suggestion**

Based on the research problem and data analysis the researcher would give some suggestion. Hopefully the suggestion will be useful for all the reader. Researcher hopes that for all of the reader especially an English teacher will use this strategy to teach speaking. Because this strategy is effective and interesting to the students' speaking skill. But, an English teacher can improve this strategy by comparing ideas from the teacher.

For the next researchers who want to conduct Vlogging on their research, the researcher suggests that the next researcher can more focus on conducting Vlogging as a strategy in teaching to increase students' speaking ability. Complete what is lacking in this research. Do not make the same mistake in researching. And researcher hopes that the next research will be better than this research.
