

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents the conclusion and suggestions based on the result of the research finding in applying literature circles strategy at SMAN 1 Prambon as presented in the previous chapter.

5.1 Conclusion

Based on the result of this research, the researcher concluded that the implementation of literature circles strategy can improve students' reading comprehension in the narrative text at tenth-grade students of SMAN 1 Prambon. The finding of this research showed that literature circles strategy can solve the students' problems in reading comprehension. The researcher analyzing the students' scores using a paired sample t-test to examine the improvement of students' reading comprehension.

The research finding showed 15 students got to score ≥ 75 from 32 students in the pre-cycle test. Meanwhile, 27 students from 32 students got to score ≥ 75 in cycle I test. Besides, the results of analyzing the students' scores using paired simple t-test proved the mean scores improved. On the other hand, the use of literature circles to students' reading comprehension gave contribution 69.6%. And the significance of paired sample tests is 0.000 which can be concluded the application of circles strategy of this classroom action research that has been applied successfully.

5.2 Suggestion

After conducting the research at SMAN 1 Prambon, the researcher would like to recommend some suggestions to make the teaching and learning process in this school better than before. The suggestion as follows:

1. For English Teacher

The teacher is the heart of education. They play many important roles in the teaching-learning process in the classroom. Therefore, every teacher should have the ability to build the environment in the classroom more interactive, and attractive through applying different methods or strategy, to help students understanding and practicing the materials easier. Literature circles strategy can be an alternative strategy in teaching reading comprehension.

2. For Students

Students must read a lot and memorize vocabulary because vocabulary is the basic component of English that plays an important role in the reading process.

3. For Further Researchers

The result of this study is expected to be used as consideration for the next researchers to do the same study with different subjects and objects of the research by using another form of test such as essay to find out more the advantages from each role in literature circles strategy.
