

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the researcher presents the conclusion of discussion. Moreover, it also provides some suggestions for the English teacher, students, and also further researcher.

A. Conclusion

The result of this research indicates that Think Pair Share gives significant effect on students' speaking skill. This strategy can encourage the students to express their ideas and concerns on the certain interesting issues. It provides the same opportunity for every student to practice their speaking in the classroom. It also encourages the students to speak confidently in the classroom because they have already had an input and ideas to share during the pair-discussion.

Furthermore, the result of this research also indicates that Think Pair Share strategy can effectively be applied in teaching speaking, especially for passive student. The students who have positive attitude toward speaking activity can easily adapt to a new teaching strategy and they enjoy it. Thus, the combination effect of an appropriate teaching strategy and the students' who have lack of talk toward speaking can effectively support the students to have better speaking achievement.

B. Suggestions

Based on the result of this research, the researcher gives some suggestions. Hopefully, the suggestion will be useful for the teacher, students, and also the further researcher.

Before designing the speaking materials, the teacher should understand what the students' interest and needs. It is important for the teacher to use the appropriate strategy, because it can reduce the students' boredom and monotonous during teaching and learning process. One of the useful appropriate strategy to use in teaching speaking is Think Pair Share.

Students have to know that English is important. So they have to keep improve their skill. Through Think Pair Share, the students have opportunities to share their ideas. It also improve students' speaking skill and motivation.

The weakness of this research is the limited time in implementing actions. Other researchers who are interested in the same field are advised to implement actions over a longer period of time to get maximum results. So that improvements will be more visible.
