

## CHAPTER V

### CONCLUSION AND SUGGESTION

This chapter concludes all the results of research. It consists of conclusion and suggestion. Conclusion consists of the normality and linearity result that shows the correlation between students' reading habit and their reading comprehension skill. Suggestion is giving suggest or advice to the school/institution, students and the next researcher.

#### 5.1 Conclusion

Based on the result of the research, the researcher concludes that the result of reading habit was in very good category since 86,25 % got  $> 80$ . Then the result of reading test was in good category since 63,75 % got  $> 66$ . Based on the result of *Pearson Product Moment Correlation* showed that there is positive and significant correlation between students' reading habit and their reading comprehension skill at the second grade of MTsN 4 Kediri. The result of this study indicate that value of sig. Rxy result are greater than r-table that is (0.924  $>$  than 0.220). Coefficient correlation of this research was in the interval 0.90 – 1.00, it means that there is very high correlation with significant value of 0.000 less than 0.05. It means that the good reading habits will definitely the good reading comprehension skills as well.

## 5.2 Suggestion

Based on the research result and conclusions above, the following suggestion can be given:

### 1. Students

There is recommendation for students in relation to this study. Students should improve their ability to absorb and comprehend different material abundantly in order to help their academic success. Then students should build a good reading habit in their daily life and maintain it by continual reading activity so that the student can improve their reading comprehension skill.

### 2. English Teacher

English teacher should consider providing a comfort room for cultural literacy and completing plenty of good books in the class, give opportunity to the student to practice reading habit and also give motivations to the students in order to improve their reading comprehension skill.

### 3. The Next Researcher

This study gives much information about the correlation and influences between reading habit and reading comprehension skill. Therefore, this study can be used as reference for future studies with similar problems or variable at different level of students and the researcher can explore other things that are more correlated with students' ability to understand and increase the reading comprehension skill.
