

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the researcher presents the conclusion of discussion. In this part, researcher also gives some suggestion for English teacher, students and also the further researcher.

A. Conclusion

Based on the research finding presented and discussed, the conclusion of the research is clustering technique is effective in teaching writing on descriptive text at the seventh grade of MTsN 6 Nganjuk. After conducting the research, there are some effects that can be felt for the teacher and students. For the teacher, they will be easier to deliver the learning objectives of descriptive writing with this method. And for student, it helped them to generate ideas and more enjoy in the classroom because they are taught with interesting methods. Students also did not confused to continue the ideas they already have. To analyze the data, the researcher used ANCOVA by using SPSS 2.5 version for windows. The result of significant value is 0.000. It means that the value of $0.000 < 0.05$ so that, the researcher can conclude that alternative hypothesis (H_a) "Clustering technique is effective in teaching students' writing ability of descriptive text at the seventh grade of junior high school students" is accepted. Therefore, clustering technique is effective in teaching writing ability on descriptive text at the MTsN 6 Nganjuk.

B. Suggestion

Based on the research problem and data analysis the researcher would give some suggestions. Hopefully the suggestion will be useful for the teacher, students and also the further researcher.

1. Teacher

After finishing this research, the researcher hopes that for an English teacher will give better teaching strategies for students during the teaching and learning process to make the students more interested and enjoy the lesson. In this way, students will have an easy way to improve their writing and also have better skills.

2. Students

Students have to know that English is important, so they have to keep improving their skills, especially in writing. Better knowledge will bring a better future for their lives.

3. Further Researcher

For the next researchers who want to conduct the Clustering Technique on their research, the researcher suggests that the next researcher could more focus on conducting Clustering to improve students' writing ability.
