

CHAPTER V

CONCLUSION

This chapter presented conclusion of the research and some suggestion based on the result of previous discussion. **A. Conclusion**

The results of the data, respondents give different responses on the use of online tests are:

1. Students perception on the use of online test

Many of the respondents gave positive responses to the online test. They have a generally positive view of the usefulness of online tests even though some of them think that online test is something new. Most of them find online test is helpful even though there are some who are still confused about how to access the online test. Lack of knowledge about technology, especially online tests (how to access online tests)) and low internet connection prevent them to do online tests. Most of them also give respond in agreement to the statement that online tests provide a great opportunity to cheat, due to the lack of control from examiner. Most respondents also consider that the quality of online tests and paper-based tests is not the same. Most of the respondents also give a negative response to the statement that online test decrease their score.

Mostof respondents also agree that students who are tech-savvy and have good experience in operating a computer / laptop / smartphone

make them easier for to do an online test. Most of the respondents agreed with disadvantages of online tests.

2. The problems faced by the students on the use of online test

From the results of this study, the researcher find four problems faced by respondent. Those are low internet network, misunderstanding. limitation tool, and cost.

3. The way students solve the problem on the use of online test

This research also found how respondents deal with the problems they face when using online tests such as finding a place that has a good network or looking for wifi.

B. Sugestion

Based on the result of the study, the researcher puts some suggestions to the following parts:

1. For the students can be flexible with the development technooogy and they should use technology by maximumly to support their learning
2. For the teacher, the teacher have to ensure that there are no opportunities for students to cheating when doing the online test by giving time to do the online test or making different questions from one student to another.
3. For the next reseacher, the researcher could investigate the effect of online test as the new system to conduct the test.
