

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

In this chapter, the researcher presents the conclusion of the findings in this study. The suggestion is also provided to the further researchers and the English students.

#### **5.1 Conclusion**

This study finds out all five types of impoliteness strategies occur in *Hidden Figures* movie, which includes bald on record, positive impoliteness, negative impoliteness, sarcasm or mock politeness, and withhold politeness. The most common impoliteness strategy is positive impoliteness which occurs 25 times. This strategy is the most widely used in *The Hidden Figures* Movie. The characters in this film tend to use this strategy since there are various races, genders, and positions that make them more often ignore the other people's presence. On the other hand, the least strategy that occurred in this study is withhold politeness which appeared twice. Withhold politeness strategy is the most rarely used in the *Hidden Figures* movie. This is because the characters in this film prefer to express their impolite actions rather than withhold politeness.

In addition, this study finds that there are three functions of impoliteness strategies based on Culpeper's theory in the *Hidden Figures* movie as well. Affective, coercive, and entertaining function appeared in the movie. The coercive function of impoliteness becomes the most used function because there are various backgrounds and power of the characters, so the characters were easier to use their beneficial position to show their differences. Then the least function appeared in

the movie is the entertaining function because the characters do not tend to poke fun at the others.

## 5.2 Suggestion

Based on the conclusion that has been explained above, some suggestions would be directed toward English students and other researchers.

### 1. For the Students

This study can be used by students to understand how pragmatics is applied in daily life utterances. It is important to know the intended meaning behind an utterance. So that the misunderstanding can be decreased or even avoided.

### 2. To next Researchers

The researcher expects the result of this study may provide benefits to the future researchers who are interested in conducting pragmatics study, particularly impoliteness strategies. It is also suggested to enlarge and develop the study by investigating all types of impoliteness strategies or other branches of linguistics since this study has not explored them yet.

### 3. For Readers

Based on the result of this study, readers are expected to be more open-minded in understanding the impoliteness strategies used in the *Hidden Figures* movie contextually. Furthermore, readers are expected to learn how to understand the deep meaning in utterances spoken or written. Moreover, readers are expected to understand what types of impoliteness strategies and the function thoroughly in this research.
