CHAPTER V

CONCLUSION AND SUGGESTION

This chapter contains the research conclusion and suggestions. The conclusion is made from the analysis of the research finding. Meanwhile, the recommendations are expected to give a contribution to the reader and the next researchers.

A. Conclusion

Based on the analysis above, the researcher concludes that:

1. There are three types pof referential cohesion which is used in The Fault in Our Stars by John Green novel. It consists of 149 personal reference, 12 demonstrative reference, and 11 comparative reference. The researcher uses percentage of the result. Personal reference is 86,6%, comparative reference is 6,4%, and demonstrative reference is 6,9%

2. The most dominant types of reference cohesion in The Fault in Our Stars by John Green is personal reference that is 149 and in percentage is 86,6%.

B. Suggestion

Based on the conclusion above, the researcher would like to propose some suggestions for the readers and the next researchers.

1. For the readers

The researcher gives suggest to the reader to improve their understanding about the types of referential cohesion. Because referential cohesion not only can find in novel but also in most other readings. So after the readers understand about referential cohesion, they can understand the contents of the reading well.

2. For the next researchers

The result of this study is expected to be used as consideration to other researcher that related with the research especially in referential cohesion. Hopefully, the next researcher can develop the scope of research widely.
