CHAPTER V

CONCLUSION AND SUGGESTION

This was the final chapter of the study, the researcher presents the conclusion and suggestion based on the research findings and discussion presented in the previous chapter.

A. Conclusion of The Study

Based on the research result that was described in chapter IV, it can be concluded that there is an improvement in speaking skill, it was 88,23%. The researcher concludes that the implementation of the Hello English application in learning speaking can improve students' speaking skills in class V of SDN Sidorejo 1 Mojokerto.

From the result of the implementation, there are some improvements as follows:

1. The mean score result for the test-1 was 4,491; for the test in cycle 1 was 6,58 and the test in cycle 2 was 9,05.

2. The criteria of students' success are 75%, then in cycle 1 was 47,05% and students' success in cycle 2 was 88,23%.

3. The mean percentage in the observation sheet students' performance in cycle 1 was 81,81% and students' performance in cycle 2 was 90,9%.

4. The advantages of Hello English: this application can help the students practice speaking English using the conversations feature, they also did some games for speaking, they easier to use the application because they

can download it free, the future is simple and interesting, and they can easier to understand about the material.

5. The disadvantages of Hello English: they can not unlock some courses because it needs to purchase a premium unlock, the connection limitations when used the application because this application has too strong connections when they log out suddenly have to repeat the exercise, and the voice of feedback using Google voice, not using native speakers.

Based on the explanation above, it can be seen that the action hypothesis is accepted. Learning students using Hello English application as medium of learning from home can improve the students' speaking skills.

B. Suggestion

Based on the classroom action research which conducted in two cycles, Hello English application is a good medium of learning that can be used to improve students' speaking skill. As a result, it can be known that the students enjoy using this application. The following suggestion the researcher gives to:

1. The English teacher

This research is expected to be able to motivate teachers to increase creativity and innovation in teaching and learning by developing media of learning to be conveyed using media that have never been presented before. Besides, this medium is also expected to be one of several media of learning and teaching that can be applied by teachers in teaching the lesson.

2. **The students**

This research is expected to be useful in terms of being able to motivate students to be more active and practice in learning speaking, by using the Hello English application. It is also expected that students have a pleasant learning experience so that the material will be easily understood by students. This medium is expected to attract the attention of students because it uses attractive medium and fun learning.

3. **Other researchers**

The researcher realizes that there is much weakness in this study. For the other research, especially those who are also interested in researching the same topic, the writer suggests finding another applicable and effective learning speaking strategy. So, the result of their research findings can be used by another teacher as another alternative teaching or learning strategy especially for learning speaking.
