CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presented the conclusion based on the results of this research to answer the research problem and suggestion for the teachers, students, and future research related to teachers' perception toward the use of Google Form in online learning. .

A. Conclusion

The aim of this study is to find out students' perception toward teachers' perception toward the use of Google Form in Online Learning. Based on the finding and discussion in the previous study, it revealed that most of the teachers stated that the use of Google Form in Online Learning is very important and useful for them. It shown from result of the questionnaire that there are many teachers stand for agree with the superiority, efficiency and effectiveness of the use of Google Form in online learning process.

Regardless of negative feeling that felt by the teachers, they still assumed that Google Form is important and enjoyable to be used in online learning process. It shown from majority of teachers feel enjoyed when using GF as a media in the online learning process. The majority of the teachers got the beneficial from the Google Form. It evidenced by 70%, as the highest percentage, teachers strongly agree that Google form can present data quickly, precisely and accurately. Besides they can get many usefulness from using Google Form.

In conclusion, teachers have a good perception toward the use of Google Form in online learning process. Yet the matter is the communication between

teachers and students is stretched because of there is no details feedback between them. The teacher should pay more attention to the communication between them and their students. So that students do not feel interrupted and embarrassed when the online learning process is running. The data that were gathered from the questionnaire shown the teachers prefer to use Google Form as a media when online learning process is running.

B. Suggestion

After conducting this study, the researcher hopes that this thesis will give some positive impacts. Therefore the researcher would like to give some suggestion for the teacher, students in teaching learning process and also for the next researcher.

1. For The Teacher

    The researcher hopes that the finding of this research can be a reference for the teachers. Understanding the use of Google Form and knowing the right situation to provide material by using Google Form so that what is delivered can be understood by students and does not have a negative impact on them or their students. It does not directly mean that using Google Form affected negatively on them or students. Yet the matter of the proper use of teachers when deliver is the main point because of the students actually get the beneficial from the learning process although it is run in online learning. .

2. For The Students

Students should be more focused to the material given by the teachers by using Google Form as a media. If the lecturer does not give feedback or communicate with the students in every online learning process, it does not mean that the teacher ignores what mistake that students made. But perhaps the teachers will give feedback or communicate with the students through other way like communicating via WhatsApp.

3. For The Next Researcher

As the suggestion for the further researches, the lecturer may be involved to the researches as the subject beside the students. It will provide a better comprehending by relating and comparing the teachers' perception and students' perception toward the use of Google Form in online learning process. In addition the statement in the questionnaire adds by providing some superiorities, infirmities, also effectiveness and efficiency of Google Form to know the perception of the teachers and students which one they prefer to use Google Form or no. So it will create good atmosphere of online learning process.
