

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, researcher presents the conclusion of the findings of this study with provides suggestion for the further researcher or the reader.

5.1 Conclusion

Based on the findings, students have positive perception in using social media and have positive belief on the use of social media. Students stated that social media provides various contents that supported students to improving their English skill. They also be free to express their opinions or ideas in social media. It reduces their anxiety to practice their speaking skill. The situation of learning in social media creates a stress-free learning environment. It makes them feel comfort and enjoy to use social media as supported media in learning English. Social media make them easy to communicate with other people in the world. Although there are some challenges that should be faced by students in using social media such as the connection and data security. But the students can handled that and they belief that social media is appropriate informal English learning media to supporting students' English proficiency inside the learning process at the school, but the scaffolding is needed in to avoid the foul impacts for students on next days.

Students also have positive perception and belief on the use of social media towards their speaking skill. They stated that using social media can support the students to enrich their vocabulary, enhance their

grammar mastery, enhance their knowledge about how to pronounce a new word, enlarge their fluency in speaking English and improve their comprehend in a English context, as we know those are the components of speaking. Social media also solves their speaking problems such as reduce the anxiety, make them braver to participate in English class, enrich their knowledge about a topic to say and reduce their mother tongue by practicing English on social media. It makes students belief that social media is an appropriate media to support them for improving their speaking skill.

5.2 Suggestion

The researcher found in this study about students perception and belief on the use of social media, the writer would like to suggest the students who are the users of social media to be more wise in using social media. It better if students using social media for education purposes. Researcher also gives suggestion for English teacher to try in using social media for supporting learning media especially for speaking class. Teacher better choose the social media most used by students mentioned before. However, the teacher should explore and comprehend much about social media before apply in the learning process. The researcher would like to suggest the other researcher to explore more about the impacts of social media in the other basic skills of English and how to decrease social media challenges in order to make the students enjoy the social media without feeling worried with the challenges faced by students.
