

CHAPTER V

CONCLUSION AND SUGGESTION

Based on the description presented in previous chapter, conclusion and suggestion are presented in this chapter.

5.1 CONCLUSION

Based on the result of the research above, it can be concluded that respondents show a positive response towards the use of online learning. The respondent mentioned that E-learning Madrasah is effective and efficient because it facilitates them to access learning material and submit tasks easily. The respondents participated in this study agree that the E-learning Madrasah system is easy to use. They think that E-learning Madrasah can increase their writing and reading. Through E-learning Madrasah, respondents can increase motivation in learning, and they can control their own learning or they can be more individual in learning.

In interview guide, there are 4 questions that were answered by the student, the respondents consist of 6 students such as leader and secretary in each class in grade 7,8 and 9. The respondents are students of MTs Al-Ishlahiyah Kandangan Kediri. The result of the interview, they still know less about E-learning but some students know so well. Then, the students agree that E-learning Madrasah is efficient and effective. But, about the score, some students agree that E-learning Madrasah can increase their score then one of them disagrees because E-learning madrasah is not really increasing their score.

5.2 SUGGESTION

Based on the result of this research, the researcher would like to give some suggestions, those are:

1. For students

The students should be active although through E-learning Madrasah. Then, The students should be creative to know what is E-learning Madrasah without waiting for the teacher, or the students can remember the teacher about that. The student should be enthusiastic to increase their score and should have some effort to learn at home.

2. For teacher

The teacher should give an explanation first, about what is E-learning Madrasah, Introduce the application and How to operate well. The teachers need to be more interactive in communication while using application media in learning process. The teacher should give some ideas to avoid the difficulties like internet access while using E-learning madrasah.

3. For the next researcher

The next researcher can explore more about student perceptions with different participants like the perceptions of the teacher in different areas. The next researcher should be more creative to prepare the article or references that will use to write the research.
