

CHAPTER V

CONCLUSIONS

In this chapter, the researcher presented the conclusions based on the research question and this chapter also gave suggestions for the teacher, workbook publisher or author and also for the next researcher

A. Conclusions

This study was focused in analyzing the student's workbooks to know the workbook quality, the workbook was analyzed in this research was the workbook for second-semester students of the second grade of senior high school. There were three requirements which used by the research to measure the workbook quality, they were didactic requirement. Technical requirements and construction requirements. Each requirement has number of criteria and each criterion consisted of some items.

The research analysis showed that the didactic was 83%. The construction requirement was 64%, and the technical requiremen was 88%. The total percentage which achieved by this workbook was 78%. The percentage placed this workbook in good level

B. Suggestion

In this part, the researcher offered some suggestions regarding the workbook quality. There were some suggestion

1. For the author or publisher

As the designer of the workbook, the author should be serious in considering the quality of the workbook. Actually there are some opinions from experts related to the how the workbook can be called as a workbook which has good quality. The author can focus on some of them before creating good workbook publishing it The publisher needs to evaluate the workbook quality before publishing it. Checking must be conducted to anticipate some mistakes in the workbook

2. For the teacher

The result of this study is expected can giving information about the significance of good quality for workbook. English language teaching and also become a consideration for the teachers in deciding or choosing workbook for their students

3. For the future researcher

For the next researchers, this research is expected to give reference or model, consideration and information that can help to conduct their study on English education exactly about appropriate qualities of the workbook
