

CHAPTER V

CONCLUSION AND SUGGESTION

A. CONCLUSION

The data collected from questionnaire and interview and the analysis of the data related to the impact of being part-time-worker students, it can be concluded that being part-worker-student does not affect students' academic achievement, however for the students who have different thought that they can utilize this chance in being part-time-worker student, it gives better result for academic achievement.

Being part-time-worker students sometimes is not a choice but it is a demand, because by being part-time-worker student is the only way to earn money for part-time-worker students who have financial motivation. On the other hand, the other students' motivation is to seek more experience. It is in line with the previous motivation in being part-time-worker student that they are not be able to get experience they mentioned in college or in another places but it is only derived by being part-time-worker students. However, being part-time-worker student does not mean that they have to get bad academic achievement, instead, they are also still able to get good academic achievement or even better result every semester because taking decision being part-time-worker students. The experience that they get in being part-time-worker student in real work situation is greatly valuable. It can not be represented by both other places and other activities.

The part-time-worker student has more experiences than ordinary students who do not have part-time job. The main point which needs to emphasize is by considering the length or work duration as good as possible. They have to seek the minimal duration for working, but it is still able to cover the purposes, getting income and experience. It must be paid attention well, because it has strong correlation with the way they manage the time for working and for studying. The good time management leads to better result of academic achievement.

B. SUGGESTION

According to result of the research, the researcher gives suggestion to all of the readers of this research. Moreover, for those who are greatly interested in conducting a research and analysis related to the impact of being part-time-worker students on their academic achievement.

This research is supposed to give contribution as well to next researcher as the previous study and reference. It can be seen from another aspects as well such as, the correlation between part-time-worker student and time management, the difference between part-time-worker students and non part-time-worker students.

After conducting the research, researcher realizes that there are many weaknesses on this research. Therefore, coming from that reason, hopefully this research can be continued and perfected by upcoming researchers.
