

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents the conclusion to answer the research problem and some suggestions to those who are in the educational field, such as the English teacher, the students, and other researchers to use Instagram in teaching writing descriptive text.

A. Conclusion

The conclusion of this research showed that using Instagram in teaching writing descriptive text at the tenth-grade students of SMAN 2 Kediri is effective. The end of assumption of ANCOVA showed the significant difference was $p (0.000) < \alpha (0.05)$. The result indicated that the significant value (p) was lower than α . It means that researcher had enough evidence to reject the null hypothesis (H_0) and accept H_a . The result of research showed there was different mean between students from experimental group who were taught use Instagram and student from control group who were taught use Power Point. In other word, students who use Instagram as a treatment got higher score than those who did not. Hence, it can be concluded that Instagram was effective in teaching writing descriptive text for the tenth-grade students.

B. Suggestion

Based on the result of the research, some suggestions will be directed toward the English teacher, the students, and other researchers.

1. To the English Teacher

The English teacher can use Instagram in teaching writing descriptive text. It

can help the English teacher in solving the students' writing descriptive text problem. The students can be more enthusiastic in learning writing descriptive text. The English teacher is suggested to use Instagram in teaching writing descriptive text because it can increase the students' writing skill, especially in writing descriptive text.

2. To the Students

The students can use Instagram that is applied by English teacher to practice writing descriptive text. The researcher hopes that by doing this, the students can easily improve their writing skill, especially in writing descriptive text.

3. To the Other Researchers

Based on the result of the research, the other researchers can use this research as the reference to conduct the next similar research. The next researchers should be able to be more creative to make something different in conducting the research.
