

## CHAPTER V

### CONCLUSION AND SUGGESTION

This part is used to state the conclusion of the research and addressing the suggestion to certain parties related to the research field. Here is the description of the chapter.

#### **A. Conclusion**

This current research was aimed at improving students' speaking skills using action learning strategy. To achieve the objective, classroom action research was designed and employed through one cycle which consisted of planning, acting, observing, and reflecting. In the planning stage was done by preparing the materials, which were competence 3.7 and 4.7 about recount text, preparing the strategy, and also consultation with the origin teacher. The acting was done in three meetings which began with clarifying the objective of the strategy and implementing the strategy during three meetings. Next, the observing phase was done by testing the students to measure their speaking skill after the action research was completed. The next was reflecting. The action research was successfully conducted through four main steps: planning, acting, observing, and reflecting. In the pre-cycle there were 10 students passed the criteria of success (75). In the posttest, it was revealed that there were 24 students or 77.42% of the total students surpassed the criteria of success. The conclusion of using action learning strategy was effective to improve students' speaking performance.

## **B. Suggestions**

Based on the results of this research and conclusion that regarding to improving speaking skills using Action learning strategy, the writer would like to suggest as follows:

### 1. To the teacher

The writer suggests that the teacher should used various media to teaching English because it can motivate their students and they will not get boring especially using the Action learning strategy as an alternative media in the teaching speaking.

### 2. To the students

The students should practice more in speaking and should not shy to express their idea especially in speaking. They must also change their mindset that speaking is difficult and try to love speaking.

### 3. For the next researcher

For the next researchers, it is needed to enlarge the field of this research. Designing different research model seems to be worth to enrich field of research. Moreover, the next researcher could also conduct similar research in the different environment to strengthen and enrich the discussion.
