

## CHAPTER V

### CONCLUSION AND SUGGESTION

This chapter presents about conclusion to answer the statement in research problem and suggestion for students, English teacher, and further researcher.

#### **A. Conclusion**

The result of correlation by using rank spearman formula shows that the coefficient of correlation is  $r = 0.976$ , and the  $r$  table for 123 samples is 0.195. It means that the hypothesis  $r = 0.976 > r\text{-table} = 0.195$  is accepted ( $H_a$ ). The correlation coefficient of the study above shows positive correlation between listening English songs habit and vocabulary mastery, it is linier with conducted by Kartika on the correlation between students' habit in listening to english song and vocabulary mastery at IAIN Palangka Raya. From the result of the correlation calculation, it can be seen that the value of correlation is 0.506 which is interpreted as a positive correlation at a moderate level. In this case that students' habit of listening to English songs has a moderate relationship or gave an influence on student's vocabulary mastery.

#### **B. Suggestion**

In suggestion, the researcher would like to give some suggestion for students, teachers, and further researcher.

##### 1) For Students

Based on students' test in vocabulary mastery, shows that any some students get low score. Although, their have listening English songs habit and almost

students getting high score in vocabulary mastery. In this case, students should increase their vocabulary mastery by listening English songs.

2) For English Teacher

By the result of the study, it can be seen that there is a positive correlation between listening English songs habit and vocabulary mastery. So that is why, as the teacher, it can be an obligation to develop the students' vocabulary mastery. Because it can increase their interest in learning English subjects. Also the teacher can decide teaching technique which can help students to easier in learning and remembering vocabulary by listening to the songs.

3) For Further Researcher

This study particularly have some problems, the researcher suggest that they prepare all of things needed in their study, especially in the instruments. If the next researcher wants to investigate the same topic in a different place or subject. It can enlarge the research field. Moreover, this study is not being perfect yet, so the researcher hopes that the next researcher can develop this study better.
