CHAPTER V
CONCLUSION AND SUGGESTION

The last chapter of this research consists of conclusions and suggestions. The conclusions part summaries the findings and discussion in chapter 4. Meanwhile, the second part is the suggestions for someone who interests in translation techniques.

A. Conclusion

After researcher analyzed the whole ten journal abstract of Premiere Educandum and its translation, it can be concluded that there are eight techniques applied out of eighteen translation techniques proposed by Molina and Albir. The eight translation techniques are used in in translated abstract of Premiere Educandum Education Journal is 14 cases of borrowing, 5 cases of calque, 33 cases of literal translation, 7 cases of transposition, 5 cases of modulation, 10 cases of reduction, 7 cases of amplification and 3 cases of establish equivalent. There are no cases of adaptation, compensation, description, discursive creation, generalization, linguistic amplification, linguistic compression, particularization, substitution, and variation found from the data which are analyzed.The researcher also found the most dominant technique used by the writer is literal translation (33%), which is translating an expression in source language in the word of words into the target language.

B. Suggestion

Based on the conclusions from this research above, some suggestions are proposed to someone as follows:

The results of this study can provide knowledge to students about theory and translation techniques. By understanding theory and technique translation, students can translate the source text into the target text accurately and legibility. Therefore, the

researcher hopes that students open their minds about the importance of learning translation techniques to help them master it foreign language.

For the next researchers who are interested in observing the translation techniques using different data objects, not only abstract from journals and theses but can also use other objects such as films, stories, books, and novels. With this, the researcher hopes that so that further research related to translation techniques can provide more knowledge and deeper understanding of translation techniques.
