

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the writer presents the conclusion and suggestion based on the analysis in the previous chapter.

5.1 Conclusion

This study describes the code switching used by the main characters in “Merry Riana: Mimpi Sejuta Dolar”. In analyzing the data, the writer uses some theories as stated in chapter two. The code switching process is taken from Fishman theory which focuses on domain, and Janet Holmes theory which focuses on factors of code switching. There are economic, social, politic and demographic.

Based on the result, the researcher concludes that the main character in this movie find the patterns of code switching used by Merry as the main character in Merry Riana movie. Merry uses English in three domains; there are friends, education and employment. In friends domain she switches her language when she talks to Irene and Alfa. In education domain Merry switches her language when she talks with Administrator Building and also in employment domain Merry switches her language when she talks with her boss/ manager.

The second, there are some factors that influences Merry, economic, social, political, and demographic factor. In economic factor, Merry uses English to get advantages in her business. In social factors, she uses English because she does not want to get noticed by the society. In Politic factor, she uses English because English is the formal language. Then, in demographic factor, she uses English because she moves to different country.

5.2 Suggestion

This research has found code switching that used in Merry Riana: Mimpi Sejuta Dolar movie focuses on the pattern and the factors. For further investigation the researcher suggests to everyone who will research about Code Switching to explore in another field. Practically this research is hoped to give a good references especially for English learners to conduct further analysis.
