

CHAPTER V

CONCLUSION AND SUGGESTION

The chapter presents the conclusion of this study and some suggestions. The conclusion include the answer of the research question and the suggestions include into certain parties.

5.1. Conclusion

The objective of this research intends to describe the learners' attitude toward the use of Google Classroom as a learning application within secondary education. Based on the explanation, it can be concluded that mostly students' in the tenth grade at SMK PGRI 2 Kediri have a good attitude toward Google Classroom as a learning application related to cognitive, affective, and behavioral aspects. Google Classroom is easy to use, free, efisien, interesting application and simple to use as a learning application for students'. In addition, Google Classroom offers helpful features that support the students' ability to manage task discipline and effective. However, some students indicated that the using Google Classroom have obstacles because sometimes they are constrained by an unstable internet network

5.2. Suggestion

Regarding the conclusion above, the researcher wants to give some suggestions to the students, teachers or lecturers and the further researchers.

The researcher suggests for the students that all English material the teacher or lecturers shared in Google Classroom should be downloaded. When students' have a good internet connection, it can help them learn English well. If students do not understand when the teacher explains the material in Google Classroom, they

must be brave to ask the teacher, look for the material in website or ask the teacher in Google Meet according to the available schedule.

For the teacher/ lecturer, the researcher suggests that not only sharing English material in the form of a file on Google Classroom but also the teacher can share a link to Youtube about the material or an example for students to understand the material well.

For the further researcher, it is recommended to explore more about students' attitude on the use of Google Classroom to get new information. Moreover, the research can also be used as a reference for the net researcher who will conduct a similar research with a different subject of the research.
