CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After processing data about what learning model MTsN 2 Kota Kediri teacher used during the covid-19 pandemic is through the Discovery Learning model. This has been through many reviews and research conducted by researcher through interviews, audio records, and documentation has found the results of the considerations that most refer to the characteristics of the learning model that is used as a reference in this study. This research shows learning model or how to deliver module, assessment and learning way that are done by Mr. Mujiyono complete the characteristics of Discovery Learning model. Such as, a teacher gives stimulus to the students to be more critical and active to solve the problems that are delivered by the teacher and give space to the students to explore the knowledge from related sources.

B. Suggestion

Judging from the results of the above research, researcher have explored an online learning system that can still lift students' competitive grades or can use the learning model equally. That way students will not lose their sense of social care and trust each other, because the students' cooperative values cannot be practiced by teacher under these conditions. Using other means such as still forming working groups and helping each other even online. But regardless, there are many differences in students' backgrounds that make it difficult to always take classes. So the skills of

teacher and parents of students are the key for students to maintain the true value of students.
