

CHAPTER V

CONCLUSION AND DISCUSSION

In this chapter the researcher want to present about some conclusion and suggestion based on the result of analysis and discussion.

A. Conclusion

1. Based on the analysis, it can be concluded that Kevin's as the main character has many different characterization. Two discussion those are (1) the characterization of the main character. (2) the psychological Conflict of Kevin's inner mind deal with his being multiple characters. The personality of Kevin could be the 5 characters. Those are Kevin as Dennis. Kevin as Berry, Kevin as Hedwig, Kevin as Patricia and the last Kevin as The Beast. Why Kevin has character multiple personality because Kevin had traumatic childhood experience in which his father left him and his mother, and his mother treat him badly. Characterization in a literary device that is used step by step in literature to highlight an explain the details about a character in a story (Martin, 1996:9). It is in the initial stage in which the researcher introduces the character with noticeable emergence. After introducing the character, the researcher often talks about behavior. Then as the story progresses, the thought conflict of the character. The next stage involves the character expressing his opinions and ideas, and getting into conversations with the rest of the characters. The final part shows how others in the story respond to the characters personality.

2. The psychological Conflict of Kevin inner mind deal with his being multiple characters. The researcher analyze used a psychoanalysis theory, Freud came to see personality as having three structure, which work together to produce all of our complex behaviors : the Id, the Ego and the Superego. All 3 strctures needed to be well balanced in order to have good amount of psychological energy available and to have reasonable mental health. However, the Ego has a difficult time dealing with the competing demands of the Superego and the Id. According to the psychoanalytic view, this psychological conflict is an intrinsic and pervasive part of human experience. The conflict between the Id and Superego, negotiated by the Ego, is one of the fundamental psychological battles all people face.

B. Suggestion

First, the researcher suggested that all of the people have a psychological conflict. To make the psychological conflict not always with the emotion, the human must control their Id, ego and superego. It is about Freud's theory of psychoanalysis. Besides that, to know the characteristics of the human, it can be from psychological conflict that she or he has because psychological conflict shows the truly characteristics from someone.

Second, for next researchers who will conduct the similar research, it can be inspiration to help them. But, it is better if the next researcher add some of the other theory to make it complete. Hopefully, the researcher hopes this research will be useful for the reader and makes the reader more likely to read some of the literary worked.
