

CHAPTER V

CONCLUSION AND SUGGESTION

In this last chapter, there are two parts are explained, conclusion and suggestion. The conclusion is explained based on the research finding and discussion above. Then, the suggestion is to lead the further researcher on the same field.

A. Conclusion

The researcher analyzed the characters of The Wright Brothers in biography by David McCullough. The wright Brothers are Wilbur Wright and Orville Wright. Like most biographies, David's biography tells the story of the Wright Brothers' journey from childhood to their success and death.

In this research, the researcher analyzed nine characters that can be found in the biographies, that are hardworking, creativity, curiosity, reading interest, friendly/communicative, democracy, discipline, responsibility, and appreciating achievement. Wilbur Wright was found nine characters, that are hardworking, creativity, curiosity, reading interest, friendly/communicative, democracy, discipline, responsibility, and appreciating achievement. Then, Orville Wright was found 5 characters, that are hardworking, coriosity, reading interest, discipline, and responsibility.

The weakness of this research is this title still seems new because this research analyze the characters of the Wright Brothers to create a means of transportation. There is no previous study that examines in detail the characters of the Wright Brothers. Another weakness is the theory used and references

which mostly use books in Indonesian, even though there are many references from abroad that can be used in this research.

B. Suggestion

After doing an analysis of the biography *The Wright Brothers*, the researcher suggest for the next writers, especially who those are interested in analyzing chacarters and character values of the biography *The Wright Brothers*. The next researcher can find much more than has been presented. On the ather hand, this research can be the reference for the next researcher in analyzing biography, especially analyzing the contribution of the character values to their success in the invention as inventor. The researcher hopes that this research is very helpful for the next researcher.
