

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents conclusion and suggestion that derived from the result of the research finding and discussion elaborated in the preceding chapter. The conclusion deal with the result of the implementation of TGT method in the process teaching vocabulary. Meanwhile the suggestions are directed to the action to be done to follow up the finding of the research.

A. Conclusion

Based on the result of this study during two cycles, it can be concluded that the implementation of using TGT method used could improve the students' achievement in vocabulary. It specified into two pints. They are the implementation of TGT method in the process of teaching vocabulary and the improvement of students' achievement using TGT method.

1. The implementation of TGT method to improve the students' achievement in vocabulary

The implementation of TGT method in every cycle conducted four meeting and consists of three steps. First is class presentation step in which there are two strategies to done, they are: question-answer and drilling. Second is teamwork. In this step the students did worksheet in discussing the material. Third is tournament. The TGT method in a tournament is trying their vocabulary but still in a group. The members who represent in tournament table have to get many points to make their first group get high

score. And the last is test. Test is done individually. It aimed to know their knowledge or their understanding the material.

2. The improvement of the students' achievement using TGT method

Before conducting the research at MTs. Hasan Muchyi, there are only 17 students could achieve minimum of passing standard. In cycle I after students did the test, only 12 students got score 70. It means that 41,37% could achievement minimum of passing standard. Here, the criteria of success are not met because less than 75% students could achieve minimum. As a result in cycle II, the research continued to the cycle II. The analysis of this cycle II showed that the 25 students could achieve minimum of passing standard. It meant that more than 75% student got score at least 70 and the average score were at least 70 done. So, the result of the criteria of success was successful.

B. Suggestion

According to the findings, the suggestion can be given to teachers and the future researcher.

1. For the teachers

It is suggested to the teachers to consider the cooperative learning in process teaching learning English Lesson. Many methods of cooperative learning, it could be implemented in teaching process. So, not only teacher became active but also students, too. In other hand, drilling the vocabulary till they doing the test, it is important because in reality the students difficult to memorize the vocabulary.

2. For the future researcher

As stated in the scope and limitation of the study, this researcher is focused only in improving the students' achievement in vocabulary at MTs. Hasan Muchyi. Since this study in action research, it is advisable that the future researcher carry out the research in improving the students' achievement in other skill and at the other institute.
